

# Production and Manufacturing Management System ex.1

# Production and Manufacturing Management System ex.2

## For Chemical Manufacturing Company Verification System

### 【Existing problems】

- Recording production results on paper  
→ **human error** such as writing errors
- In case of using problematic material,  
**it takes much time to search for** the objective products.

### 【After Introducing system】

- Make a **database** of production results  
→ **accomplishment of traceability**
- Operation check with **handy terminal**  
→ **prevention against human errors**
