

HMI Monitoring System

We suggest use of HMI and custom-made development which matches your budget and specifications.

(1) . System Construction Example of Water Treatment Facility

For Semiconductor Factories Integrated water-treatment system

- Purity and Recovery Facility
- Ultrapure water Facility
- Discreet Recovery Facility
- Effluent treatment Facility

Characteristic

Communicate by Optical Fiber Loop Network

between PLC and SCADA with which is dotted a distract place from central monitor room.

For 24-hours operation, PLC · PC (Server) is made duplication, not to stop the control and monitoring system.

Amount

Di/Do : About 7800

Ai/Ao : About 400

System Construction

SCADA : 7pcs(iFIX5.0)

Server : 2pcs(Windows 2003 Server)

Client : 5pcs

System Construction Design
