

## View Recognition Device

Accurate control system/ waste cut/ inspection system using a camera (view recognition device)

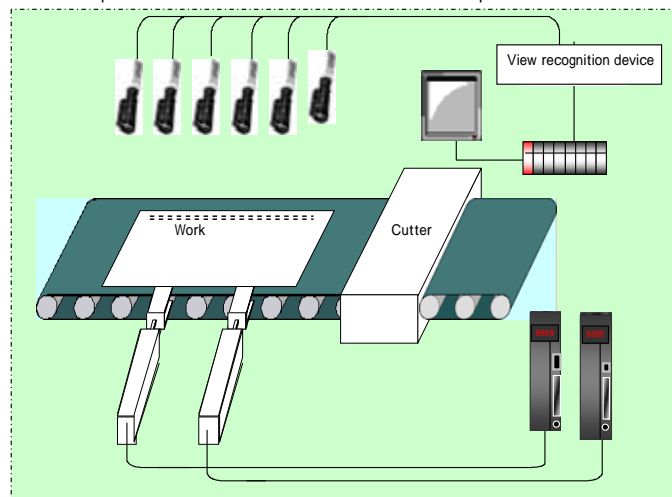

### ( 1 ) . Coating material waste cut system

Decrease coating material waste by monitoring surface of goods with cameras.

### ( 2 ) . Positioning Control (difficult with generic sensors)

Control the position to cut the material based on the work pattern.

### ( 3 ) . Automation of manual tasks by operators

Automation of record form generation by letter-recognition with cameras.
